Item 2.02. Results of Operations and Financial Condition.

On January 27, 2011, Brunswick Corporation ("Brunswick") announced its financial results for the fourth quarter and full year of 2010. The news release issued by Brunswick announcing its fourth quarter and full year 2010 earnings is incorporated herein by reference and is included as Exhibit 99.1 to this Current Report on Form 8-K.

In the news release, Brunswick uses non-GAAP financial measures. For purposes of SEC Regulation G, a "non-GAAP financial measure" is a numerical measure of a registrant's historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows of the issuer; or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented. Operating and statistical measures and certain ratios and other statistical measures are not non-GAAP financial measures. GAAP refers to generally accepted accounting principles in the United States.

Brunswick has used the financial measures that are included in the news release for several years, both in presenting its results to shareholders and the investment community and in its internal evaluation and management of its businesses. Brunswick's management believes that these measures (including those that are non-GAAP financial measures) and the information they provide are useful to investors because they permit investors to view Brunswick's performance using the same tools that Brunswick uses and to better evaluate Brunswick's ongoing business performance. Brunswick's management believes that the non-GAAP financial measure "free cash flow" is also useful to investors because it is an indication of cash flow that may be available for investment in future growth initiatives. Brunswick defines free cash flow as cash flow from operating and investing activities (excluding cash used for acquisitions, investments, and purchases of marketable securities) and excluding financing activities. Brunswick's management believes that the measure "total liquidity" is useful to investors because it is an indication of Brunswick's available highly liquid assets and immediate sources of financing. Brunswick defines total liquidity as cash and cash equivalents, short-term investments in marketable securities and long-term investments in marketable securities, as presented in its consolidated balance sheets, plus amounts available under its asset-based lending facilities. The measure "diluted loss per common share, as adjusted" is also believed to be useful to investors because it represents a measure of Brunswick's losses, without the impact of restructuring, exit and impairment charges and special tax items. Brunswick defines diluted loss per common share, as adjusted, as diluted loss per common share, excluding the earnings or loss per share impact for restructuring, exit and impairment charges, as well as special tax items. Additionally, Brunswick's management believes that the measure "net debt" is useful to investors because it is an indication of Brunswick's ability to repay its outstanding debt using its current cash and cash equivalents. Brunswick defines net debt as the sum of shortterm and long-term debt, less cash and cash equivalents, short-term investments in marketable securities and long-term investments in marketable securities.

The information in this report and the exhibit attached hereto shall not be deemed to be "filed" for purposes of Section 18 of the Securities and Exchange Act of 1934, or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

Item 9.01. Financial Statements and Exhibits.

Brunswick Reports Fourth Quarter Results

- · Higher Revenue and Improved Operating Earnings
- · Outlook: Return to Profitability in 2011
- · Outlook: Continued Generation of Positive Free Cash Flow

LAKE FOREST, Ill., Jan. 27, 2011 -- Brunswick Corporation (NYSE: BC) today reported results for the fourth quarter of 2010:

- · Net sales of \$728.8 million, up 11 percent versus fourth quarter 2009.
- · Operating loss improved by \$113.5 million from fourth quarter 2009.
- · Net loss of \$1.17 per diluted share versus a net loss of \$1.40 per diluted share in the prior year.
- · Cash and marketable securities totaled \$657.1 million, up from 2009 year-end balance of \$527.4 million.

2010 Full-Year Results:

- · Net sales of \$3,403.3 million, up 23 percent versus 2009.
- · Operating earnings improved by \$586.8 million from 2009.
- · Net loss of \$1.25 per diluted share versus a net loss of \$6.63 per diluted share in the prior year.
- · Positive free cash flow of \$163.2 million, included receipt of federal tax refund.

"Throughout the past several years, Brunswick has undergone a profound transformation against the backdrop of very difficult global economic and marine markets," said Brunswick Chairman and Chief Executive Officer Dustan E. McCoy. "In 2010, we continued to make significant strides in rationalizing our manufacturing footprint and executing against strategies that have allowed us to operate our businesses more efficiently, contributing to strong levels of operating leverage. During 2010, our annual revenues increased by 23 percent and, excluding restructuring charges, our operating earnings increased by approximately \$477 million as compared to 2009. In addition, we achieved our objective of being free cash flow positive during 2010."

For the year ended Dec. 31, 2010, the company reported net sales of \$3,403.3 million, up from \$2,776.1 million a year earlier, and operating earnings of \$16.3 million, which included \$62.3 million of restructuring, exit and impairment charges. In 2009, the company had an operating loss of \$570.5 million, which included \$172.5 million of restructuring, exit and impairment charges.

For 2010, the company reported a net loss of \$110.6 million, or \$1.25 per diluted share, compared with a net loss of \$586.2 million, or \$6.63 per diluted share, for 2009. The diluted loss per share for 2010 included restructuring, exit and impairment charges of \$0.70 per diluted share, and a \$0.03 per diluted share charge from special tax items. The loss per diluted share for 2009 included \$1.95 per diluted share of restructuring, exit and impairment charges, and a \$1.09 per diluted share benefit from special tax items.

Fourth Quarter Results

For the fourth quarter of 2010, the company reported net sales of \$728.8 million, up from \$657.3 million a year earlier. For the quarter, the company reported an operating loss of \$74.7 million, which included \$18.5 million of restructuring, exit and impairment charges. In the fourth quarter of 2009, the company had an operating loss of \$188.2 million, which included \$68.6 million of restructuring, exit and impairment charges.

For the fourth quarter of 2010, Brunswick reported a net loss of \$104.1 million, or \$1.17 per diluted share, compared with a net loss of \$124.0 million, or \$1.40 per diluted share, for the fourth quarter of 2009. The diluted loss per share for the fourth quarter of 2010 included restructuring, exit and impairment charges of \$0.21 per diluted share and a \$0.02 per diluted share charge for special tax items. The loss per diluted share for the fourth quarter of 2009 included \$0.78 per diluted share of restructuring, exit and impairment charges, and a \$1.20 per diluted share benefit from special tax items.

"The factors that positively affected our revenues and earnings in the fourth quarter of 2010, compared to the previous year, included higher sales levels in our marine and fitness businesses and lower discounts required to facilitate retail boat sales. During the quarter, we also benefited from lower restructuring charges and reduced losses on early extinguishment of debt, as well as lower pension and bad debt expenses. Partially offsetting these factors were higher income tax provisions," McCoy said.

Review of Cash Flow and Balance Sheet

Cash and marketable securities totaled \$657.1 million at the end of the fourth quarter, up \$129.7 million from year-end 2009 levels. This increase reflects net cash provided by operating activities of \$205.4 million, which included the receipt of a \$109.5 million federal tax refund. Net cash provided by operating activities was positively affected by changes in certain current assets and current liabilities during 2010. These changes were largely the result of increases in accrued expenses and accounts payable, partially offset by increases in net inventories.

Net debt (defined as total debt, less cash and marketable securities) was \$173.5 million, down \$150.0 million from year-end 2009 levels. The change in net debt primarily reflects the \$129.7 million increase in total cash and investments. The company's total liquidity (defined as cash and marketable securities, plus amounts available under its asset-backed lending facilities) was \$819 million, up \$203 million from year-end 2009 levels.

Marine Engine Segment

The Marine Engine segment, consisting of the Mercury Marine Group, including the marine parts and accessories businesses, reported net sales of \$353.3 million in the fourth quarter of 2010, up 17 percent from \$302.4 million in the fourth quarter of 2009. International sales, which represented 51 percent of total segment sales in the quarter, increased by 15 percent. For the quarter, the Marine Engine segment reported an operating loss of \$17.4 million, including restructuring charges of \$7.4 million. This compares with an operating loss of \$59.4 million in the year-ago quarter, which included \$8.2 million of restructuring and impairment charges.

Sales were higher across all of the segment's main operations, including a 10 percent increase in the domestic marine parts and accessories businesses, which represented 21 percent of total segment sales in the quarter. The segment's outboard engine business experienced the greatest percentage sales growth.

Mercury's manufacturing facilities continued to increase production during the quarter in response to customer requirements. Lower bad debt and pension expenses, incentives associated with Mercury's plant consolidation activities, higher sales, fixed-cost reductions, increased fixed-cost absorption and improved operating efficiencies, all had a positive effect on operating earnings during the quarter.

Boat Segment

The Boat segment is comprised of the Brunswick Boat Group, and includes 16 boat brands. The Boat segment reported net sales of \$163.6 million for the fourth quarter of 2010, an increase of 7 percent compared with \$153.4 million in the fourth quarter of 2009. International sales, which represented 40 percent of total segment sales in the quarter, increased by 8 percent during the period. For the fourth quarter of 2010, the Boat segment reported an operating loss of \$69.3 million, including restructuring, exit and impairment charges of \$10.0 million. This compares with an operating loss of \$131.6 million, including restructuring, exit and impairment charges of \$58.3 million, in the fourth quarter of 2009.

Boat segment production increased during the quarter, compared to the low levels in the fourth quarter of 2009, in response to the inventory requirements of dealers. Lower restructuring, exit and impairment charges, reduced discounts required to support retail sales by dealers and higher sales had a positive effect on the segment's reduction in operating losses in the quarter.

Fitness Segment

The Fitness segment is comprised of the Life Fitness Division, which designs, manufactures, and sells Life Fitness and Hammer Strength fitness equipment. Fitness segment sales in the fourth quarter of 2010 totaled \$162.0 million, up 11 percent from \$146.4 million in the year-ago quarter. International sales, which represented 47 percent of total segment sales in the quarter, decreased by one percent. For the quarter, the Fitness segment reported operating earnings of \$24.4 million, which included restructuring charges of \$0.1 million. This compares with operating earnings of \$20.5 million in the fourth quarter of 2009, which included restructuring charges of \$0.5 million.

Domestic commercial and consumer equipment sales increased during the quarter. Improved operating earnings in the fourth quarter of 2010, when compared with 2009, reflect higher sales and increased fixed-cost absorption.

Bowling & Billiards Segment

The Bowling & Billiards segment is comprised of Brunswick retail bowling centers; bowling equipment and products; and billiards tables and accessories. Segment sales in the fourth quarter of 2010 totaled \$79.5 million, down 3 percent compared with \$82.2 million in the year-ago quarter. International sales, which represented 23 percent of total segment sales in the quarter, decreased by 12 percent. For the quarter, the segment reported operating earnings of \$0.2 million, including restructuring and exit charges of \$1.2 million. This compares with operating earnings of \$2.2 million, including restructuring and exit charges of \$0.5 million in the fourth quarter of 2009.

For the quarter, equivalent-center sales for retail bowling were flat, while bowling products experienced a decline in sales. The reduction in operating earnings in the fourth quarter of 2010, when compared with 2009, reflects lower sales, the effect of a write-down of a vacant property, and higher restructuring and exit charges, partially offset by lower pension and bad debt expenses.

Outlook

See Brunswick's Web Site for Supplemental Chart:

http://www.brunswick.com/investors/investorinformation/events-presentations.php

"In 2011, we will continue to remain disciplined to generate positive free cash flow, perform better than the market and demonstrate outstanding operating leverage," McCoy said.

"We currently expect to have positive earnings per share in 2011, beginning in the first quarter. We believe the significant decline in overall industry marine retail demand has bottomed in 2010, but at this early point in the marine selling season, we are unable to determine if 2011 marine retail demand will remain consistent with 2010 or improve.

"We are also unable to determine the specific timing of any improvement and how each boat category will perform versus 2010 levels. Without a clear view of 2011 marine demand, we are currently expecting modest revenue growth for the consolidated company. In our marine segments, we believe that wholesale and production units will closely match retail demand on an annual basis. Therefore, the level of 2011 revenue and earnings growth will be primarily governed by marine retail demand.

"Our current manufacturing footprint and cost structure should allow us to report strong future earnings leverage. Without considering the effects of changes to our fixed manufacturing cost structure or operating expenses, our earnings leverage (on incremental revenue) should approximate 30 percent. Our 2011 net income should also benefit from our previously announced marine plant consolidations, lower restructuring costs, net interest, depreciation and pension expenses, partially offset by a modest increase in our tax provision.

"After taking all these factors into consideration, we expect our 2011 earnings per share to be in the range of \$0.05 per share to \$0.40 per share. At the time of our first quarter earnings release, we should have a clearer view of marine retail demand for 2011 and we will provide an updated outlook for 2011," McCoy concluded.

Conference Call Scheduled

Brunswick will host a conference call today at 10 a.m. CST, hosted by Dustan E. McCoy, chairman and chief executive officer, Peter B. Hamilton, senior vice president and chief financial officer, and Bruce J. Byots, vice president – corporate and investor relations.

The call will be broadcast over the Internet at www.brunswick.com. To listen to the call, go to the Web site at least 15 minutes before the call to register, download and install any needed audio software.

Security analysts and investors wishing to participate via telephone should call (866) 277-1182 (passcode: Brunswick Q4). Callers outside North America should call (617) 597-5359 (passcode: Brunswick Q4) to be connected. These numbers can be accessed 15 minutes before the call begins, as well as during the call. A replay of the conference call will be available through midnight CST Thursday, Feb. 3, 2011, by calling (888) 286-8010 (passcode: 70808130) or international dial (617) 801-6888 (passcode: 70808130). The replay will also be available at www.brunswick.com.

Forward-Looking Statements

Certain statements in this news release are forward-looking as defined in the Private Securities Litigation Reform Act of 1995. Such statements are based on current expectations, estimates and projections about Brunswick's business. These statements are not guarantees of future performance and involve certain risks and uncertainties that may cause actual results to differ materially from expectations as of the date of this news release. These risks include, but are not limited to: the effect of the amount of disposable income available to consumers for discretionary purchases, tight consumer credit markets, and the level of consumer confidence on the demand for marine, fitness, billiards and bowling equipment, products and services; the effect of adverse general economic conditions; the ability to successfully complete restructuring efforts in accordance with projected timeframes and costs; the effect of higher product prices due to technology changes and added product features and components on consumer demand; the effect of competition from other leisure pursuits on the level of participation in boating, fitness, bowling and billiards activities; the effect of interest rates and fuel prices on demand for marine products; the ability to successfully manage pipeline inventories; the ability to respond to and minimize the negative financial impact of legislative and regulatory developments, including those related to climate change; the financial strength of dealers, distributors and independent boat builders; the ability to maintain mutually beneficial relationships with dealers, distributors and independent boat builders; the ability to maintain effective distribution and to develop alternative distribution channels without disrupting incumbent distribution partners; the ability to maintain market share, particularly in high-margin products; the ability to develop new and innovative products and ensure their success; the ability to maintain product quality and service standards expected by customers; competitive pricing pressures, including increased competition from Asian competitors; the ability to develop cost-effective product technologies that comply with regulatory requirements; the ability to transition and ramp up certain manufacturing operations within time and budgets allowed; the ability to successfully develop and distribute products differentiated for the global marketplace; negative currency trends, including shifts in exchange rates; the success of global sourcing and supply chain initiatives; the ability to obtain components, parts and raw materials from suppliers in a timely manner and for a reasonable price; the risk of losing a key account or a critical supplier; competition from new technologies; the ability to complete environmental remediation efforts and resolve claims and litigation at the cost estimated; the ability to comply with environmental and zoning requirements, including environmental regulations for marine engines; the impact of international political instability and civil unrest on manufacturing operations and retail demand; the inherent risk of doing business in developing countries; the effect that catastrophic events may have on consumer demand and the ability to manufacture products, including hurricanes, floods, earthquakes, and environmental spills; and the effect of weather conditions on demand for marine products and retail bowling center revenues. Additional factors are included in the company's Annual Report on Form 10-K for 2009 and Quarterly Report on Form 10-Q for the quarters ended April 3, 2010 and July 3, 2010. Such forward-looking statements speak only as of the date on which they are made and Brunswick does not undertake any obligation to update any forward-looking statements to reflect events or circumstances after the date of this news release, or for changes made to this document by wire services or Internet service providers.
